is there an internal relationship between consciousness and intentionality can mental content be described in such a way so as to avoid dualism what is the influence of social context upon consciousness conceptions of self and mental content this book considers questions such as these and argues for a conception of consciousness mental content and intentionality that is anti cartesian in its major tenets focusing upon the rule governed nature of concepts and the grounding of the rules for concept use in the practical world intentional consciousness emerges as a phenomena that depends upon social context given that dependence the authors consider and set aside attempts to reduce human consciousness and intentionality to phenomena explicable at biological or neuroscientific levels series a

in present times certain fields of science are becoming aware of the necessity to go beyond a restrictive specialization and establish an open dialogue with other disciplines such is the case of the approach that neuroscience and philosophy are performing in the last decade however this increasing interest in a multidisciplinary perspective should not be understood in our opinion as a new phenomenon but rather as a return to a classical standpoint a proper understanding of human features organic cognitive volitional motor or behavioral for example requires a context that includes the global dimension of the human being we believe that grand neuroscientific conclusions about the mind should take into account what philosophical reflection has said about it likewise philosophers should consider the organic constitution of the brain to draw inferences about the mind thus both neuroscience and philosophy would benefit from each other s achievements through a fruitful dialogue one of the main problems a multidisciplinary group encounters is terminology the same term has a different scope in various fields sometimes even contradictory such is the case of habits from a neuroscientific perspective a habit is a mere automation of an action it is therefore linked to rigidity and limitation however from a classical philosophical account a habit is an enabling capacity acquired through practice which facilitates improves and reinforces the performance of certain kind of actions from neuroscience habit acquisition restricts a subject s action to the learnt habit from philosophy habit acquisition allows the subject to set a distance from the simple motor performance to cognitively enrich the action for example playing piano is a technical habit considering the neuroscientific account a pianist would just play those sequences of keystrokes that had been repeatedly practiced in the past however according to the philosophical perspective it would allow the pianist to improvise and moreover go beyond the movements of their hands to

concentrate in other features of musical interpretation in other words a holistic view of habits focuses on the subject s disposition when facing both known and novel situations we believe neuroscience could contribute to achieve a deeper understanding of the neural bases of habits whose complexity could be deciphered by a philosophical reflection thus we propose this research topic to increase our understanding on habits from a wide point of view this collection of new experimental research empirical and theoretical reviews general commentaries and opinion articles covers the following subjects habit learning implicit memory computational and complex dynamical accounts of habit formation practical cognitive perceptual and motor habits early learning intentionality consciousness in habits performance neurological and psychiatric disorders related to habits such as obsessive compulsive disorder stereotypies or addiction habits as enabling or limiting capacities for the agent
